

**Jason Boshoff** – Producer / Engineer / Mixer / Programmer / Remixer

Jason’s baptism into music started as a DJ playing at parties for family and friends. By the time he was 15 he was DJ’ing Professionally at various Night Clubs – keeping a very low profile from i.d. inspectors and his parents alike! At the same time he became interested in how music was made and struck up a relationship with a local studio owner and began dropping-in to remix, write, produce and engineer for local artists. One song that he wrote and Produced became a No.1 Single in South Africa. From there Jason became Chief Engineer at the legendary Battery Studios in London and suddenly found himself as the favoured Engineer for all the **Jive Records** artists coming through the UK including **Groove Armada**, **Kealer**, **Emma Holland** and **Jason Downs**. When Battery closed in 2004 Jason tried his hand at A&R working with Jive but within weeks was longing for the studio and jumped at the opportunity to mix the **Basement Jaxx** smash “Oh My Gosh”. Following a chance introduction to **Marius De Vries** they struck-up a vibrant relationship that lead to Jason Engineering and Programming on all his UK productions including helping steer the mixing and post-production of **David Gray**’s “Slow Motion”.

After gaining fantastic attention for his mixes with **Shy Child** (pias/wos) Jason went on to Mix an album for Thomas Troelsen's new band '**Private**' (Universal). The singles and album have gone to #1 in Denmark (Private's home) amid a whirl of amazing press attention. Expect to see their über Glamour make its way to the rest of world soon. Jason recently dropped in with the **Basement Jaxx** to laser guide some recording whilst also establishing a strong relationship with City Rockers Producing a single for **Middleman** and working on new tracks with Glaswegian electro act **Big Face**. Jason recently finished work on the STUNNING debut album for **Lisa Hannigan** and is now finalising the debut album with Belgian electro duo '**Soldout**'.

**Selected Discography**

<b>Artist</b>	<b>Project</b>	<b>Role</b>
